

Retirement Accommodations Options for Your Patients

A resource for medical professionals

At Parkland, we strive to be a resource to seniors and their families within the communities where we live and work. By offering a variety of lifestyle options, we provide seniors and their loved ones with the ultimate peace of mind and the comfort of knowing that support is available when needed.

Parkland's Lifestyle Continuum

Parkland offers a full lifestyle continuum from independent apartments to full 24/7 support with all activities of daily living (ADLs). All Parkland locations have staff on site 24 hours a day with 24-hour emergency response.

- Incontinence care
- Palliative care

Short-Term Accommodations for Your Patients

A resource for medical professionals

You want what's best for our senior population. That's why we've developed a variety of temporary stay options for patients who need immediate support, but aren't quite ready to leave their homes.

Winter/Short-Term Stays

The ideal option for seniors who are independent, but require some support with activities such as cooking, cleaning and transportation. Perfect for the winter months when seniors find the days long and upkeep of their home overwhelming.

Respite Stays

Respite stays are designed to provide temporary relief for a caregiver. They provide seniors with a safe and welcoming environment equipped with the comforts of home.

Rehabilitation Stays

Ideal for post-hospital recovery in a setting that provides optimal support. Your patients can meet with our friendly and professional Resident Services Manager to ensure Parkland Retirement Living can provide for all of their needs.

Emergency Placement

(Select New Brunswick properties only)

Beds are generally used to prevent unnecessary hospital admissions for adults facing social or environmental crisis due to their caregivers being unable to provide care, or for unforeseen circumstances beyond their control.

Beds are for individuals who are ambulatory, medically stable and require care and supervision for a short period of time.
